

HR Automation Suite

Offline Installation Guide — No Internet Required

This guide explains how to install the HR Automation Suite on a PC with NO internet connection. All files must be copied from another PC (with internet) to a USB drive first.

■ Step 1 — Download These on an Internet PC First

Software	Version	Download URL
Python	3.12.5	python.org/downloads
PostgreSQL	17.x	postgresql.org/download/windows
Git	2.53.0+	git-scm.com/download/win

■ Step 2 — Download Python Libraries (Exact Versions)

On an internet-connected PC, download all library wheels (.whl files) using this command:

```
pip download -r requirements.txt -d ./offline_packages
```

This will create an 'offline_packages' folder. Copy it to USB.

Library	Version	Purpose
Flask	3.1.3	Web framework
Werkzeug	3.1.7	Flask dependency
Jinja2	3.1.6	HTML templating
MarkupSafe	3.0.3	Jinja2 dependency
click	8.3.1	Flask dependency
blinker	1.9.0	Flask dependency
itsdangerous	2.2.0	Flask dependency
psycopg2-binary	2.9.11	PostgreSQL connector
python-docx	1.2.0	Word document generation
reportlab	4.4.10	PDF generation
lxml	6.0.2	python-docx dependency
pillow	12.1.1	Image processing
charset-normalizer	3.4.6	Encoding handling
typing_extensions	4.15.0	Type hints

■ Step 3 — Copy These to USB Drive

Item	Description
python-3.12.5.exe	Python installer
postgresql-17-installer.exe	PostgreSQL installer
Git-2.53.0-installer.exe	Git installer
offline_packages/ (folder)	All Python libraries
hr-automation-suite/ (folder)	The project code

■■ Step 4 — Install on the Offline Company PC

Run these steps on the company PC:

1. Install Python 3.12.5 — check ■ 'Add Python to PATH'
2. Install PostgreSQL 17 — remember the password you set
3. Install Git
4. Copy hr-automation-suite folder to Desktop
5. Open Command Prompt and run:

```
cd Desktop\hr-automation-suite
python -m venv venv
venv\Scripts\activate
pip install --no-index --find-links=E:\offline_packages -r requirements.txt
```

■■ Replace E:\ with your USB drive letter (check in File Explorer)

■ Step 5 — Setup PostgreSQL Database

Open Command Prompt and run:

```
psql -U postgres
CREATE DATABASE hr_intern_db;
\q
```

Then update config.py with your PostgreSQL password.

■ Step 6 — Run the Application

```
python app.py
```

Open browser and go to: <http://localhost:5001>

■■ Keep this guide and the USB drive safe. For support: rohillaiai030502@gmail.com
